

# Mountain Lion Track Identification

North Dakota Game and Fish Department

# North Dakota Game & Fish Department Mountain Lion Range

 Primary Mountain Lion Range  Secondary Mountain Lion Range

Mountain lions inhabit the badlands and Missouri River breaks regions of North Dakota. However, because they are capable of traveling great distances, they have turned up in all parts of North Dakota.

Canine tracks are commonly mistaken for mountain lion tracks.

This video will show you how to tell the difference and will also look at other similar tracks.

# Mountain Lion vs. Canine

# Mountain Lion

# Canine

Heel pad: 2 lobes on front

Heel pad: 3 lobes on back

Heel pad: 1 lobe on front

Heel pad: 2 lobes on back

# Mountain Lion

# Canine

**Retractable claws**

**Claw marks**

**Occasionally claw marks may be seen in mountain lion tracks**

# Mountain Lion

Toes point forward

# Canine

Toes point outward

# Mountain Lion

# Canine

3-3.5 inches wide

Round or wider than long

Longer than wide

# Mountain Lion

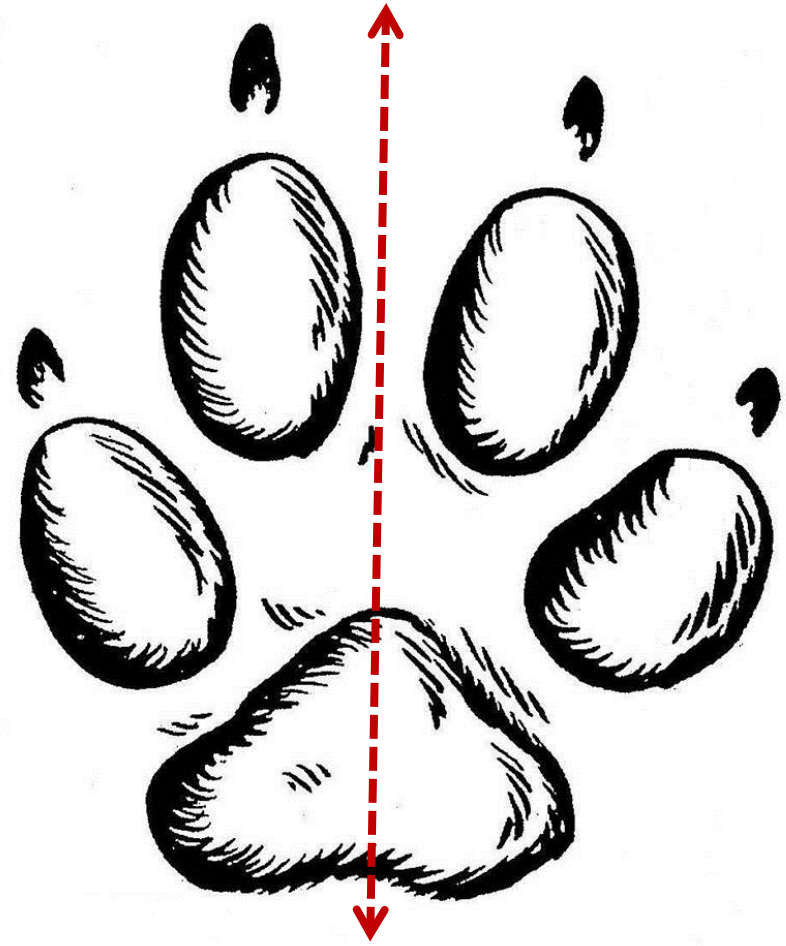

2 halves of foot not identical

Leading Toe  
(esp. front foot)

# Canine

2 halves of foot generally identical

# Mountain Lion
